- Freshwater cooling on main engines
- Type 316 SS hose clamps throughout, double clamps below waterline
- "T-bolt" type hose clamps on entire exhaust system
- Manganese bronze rudders
- Aquamet 22 2" propeller shafts
- Dripless shaft seals
- Recessed hydraulic trim tabs
- Custom exhaust risers and surge tubes
- Mufflers
- Hynautic hydraulic steering
- Oil change system, mains, transmissions, generator

Testimonials:

"If there is one word that sum's up my boat, it's performance. It's been designed for performance from the outside-in rather than the inside-out and built for harsh, saltwater conditions. I recently ran it 1800 miles from Florida, throughout the Bahamas, and back-no worries, no problems. The day after we got back the boat was ready to do the same trip again."

Owner Liberty 42 Express

"If you travel far offshore and want a boat that will get you there and back in comfort every time, Liberty must top your list of considerations."
